PRINCIPAL

Mr. Rasik Patil
(Gurukul Global School)

Education is a life-long learning process. Learning happens all the time; not only in a pre-designated place called the school. It happens in the home, between home and school too. The home's and school's mission therefore is to provide a learning environment and opportunities to the children as the learners.

Shaping young, impressionable minds is one of life's biggest challenges. At Gurukul Global School, Wada, we aim to empower our students to grow as individuals with strong open discerning minds with an international perspective, preparing them to make a mark in the global village – the world has come to be today.

Our distinctive academic programmes and innovative teaching methodologies encourage students to develop critical-thinking and learn through enquiry and reason, to exchange thoughts and ideas, to develop key personal and social values, to take ownership for his/ her choices and to set goals to realize their own unique potential.

The teachers approach the classroom as one does a temple. Teacher-student relationships take time to develop and deepen and need a climate of love and trust. There must also be continuity between teachers and students both within the classroom and in the wider school environment.

Parental involvement in a child's education process is both a gift to your child and a gift to the school. This partnership is strongly encouraged and highly valued at GGS.

We value igniting the spark of creativity and curiosity in our students. - Gurukul Global School
